Office Action Summary

Applicant's election with traverse of group I in Paper No. 5 is acknowledged.

The traversal is on the ground(s) that no burden has been shown. This is not found persuasive because burden has been shown by the classification of the inventions into entirely different classes.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/32134 (WO '134).

WO '134 teaches discloses MONO-PEG-IL<sup>10</sup>~~10~~ conjugates (p. 28 examples 9, 10, p.14 et seq. "isolation of MONO-PEG conjugates"). Attachment to Histidine is specified (abstract). PEG at MW 20,000 is disclosed (page 11 lines 19-28). The examiner takes notice under MPEP 2144.03 that the N-terminal amino acid of IL-10 is Histidine.

Claims 7-8 allowed.

Claims 1-2, 4 rejected.

Claims 3, 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
